PROFESSIONAL SUMMARY

MCA student (2026) with strong hands-on experience in Python-based backend development, Generative AI, OCR-driven automation, and data analytics. I worked on AI-powered systems including document automation, RAG applications, predictive models and Data Analysis

EDUCATION

Master of Computer Applications (MCA), - 2024–2026

Ajay Kumar Garg Engineering College, Ghaziabad (AKTU)

Bachelor of Computer Applications (BCA), - 2021–2024

Meerut Institute of Technology, Meerut (CCSU)

TECHNICAL SKILLS

Programming: Python, SQL

Data Science & ML: NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn

Generative AI & NLP: LLMs, RAG, Prompt Engineering, NLP, Embeddings

Frameworks & Tools: Streamlit, LangChain, Git, GitHub

Databases: MySQL, Chroma Vector DB

Visualization & BI: Excel, Power BI, Tableau

Core Concepts: OOP, SDLC, Cloud Computing

PROJECTS

PDF Invoice Data Extraction & Automation System – Python, OCR, OpenAI API

- Built an automated invoice processing pipeline handling both text-based and scanned PDFs using OCR fallback.
- Implemented regex-based field extraction and data validation for invoice numbers, dates, and totals.
- Exported structured outputs (JSON, CSV) enabling faster reporting and analytics while reducing manual effort.

RAG-Based Book Assistant – Streamlit, LangChain, Vector Database

- Developed a Retrieval-Augmented Generation system for document-based question answering over PDFs.
- Integrated embedding-based semantic search using Chroma for accurate and context-aware responses.
- Designed prompt pipelines to ensure responses remained grounded in source documents.

Traffic Flow Prediction System – Python, Machine Learning

- Analysed historical traffic data to identify congestion patterns and predict traffic conditions.
- Built and evaluated a Random Forest classifier with feature engineering and preprocessing techniques.

Ola Data Analysis – Power BI, Excel

- Developed an interactive Power BI dashboard to analyse and visualize over 1laks+ data, including booking trends and revenue insights.
- Delivered actionable insights on ride frequency, cancellations, and driver ratings for decision-making scenario

Fun Chat Bot – Streamlit + Mistral AI

- An interactive chatbot that maintains conversation memory and responds with a fun personality named Jassi.
- Chat interface using Streamlit, Conversation memory using LangChain messages, Powered by Mistral LLM
Fun assistant personality ("Jassi"), Environment-based API key management

EXPERIENCE

Software Development Intern – Amar Ujala Limited, Meerut

February 2026 – May 2026

- Assisted in development, testing, and maintenance of internal automation and backend systems.
- Collaborated with cross-functional teams to enhance software reliability and process automation.
- Contributed to an automated PDF processing solution used in internal workflows.

CERTIFICATIONS

Advanced Python Programming – Infosys Springboard

SQL Certification – Hacker Rank

Core Java Training (8 Weeks) – Sunrise Technologies

AWS Fundamentals – Udemy
